

# Endangered Species Research

This outline will help you to identify important areas of research about your animal. Be sure to take detailed notes from the Webquest links in order to create a detailed research report. All of the headings below will be a required component for your research project.

**Name:** \_\_\_\_\_

**Animal:** \_\_\_\_\_

**Appearance:** Describe all of the physical features:

---

---

---

---

---

---

---

---

**Natural Habitat: Where does your animal live?  
(Discuss in Detail)**

---

---

---

---

---

---

---

---

---

---

**Adaptations: What adaptations has the animal made to survive within its' habitat? (Provide at least 2 adaptations)**

---

---

---

---

---

---

---

---

**Food: What does your animal eat? (Explain is it a Herbivore, Carnivore or Omnivore?)**

---

---

---

---

---

---

---

---

---

---

**Predators: What predators does your animal have, if any?**

---

---

---

---

---

---

---

---

Describe its Life Cycle include reproduction:

---

---

---

---

---

---

---

---

---

---

---

What are the reasons for being Endangered/Threatened?:

---

---

---

---

---

---

---

---

---

---

---

**Conservation Efforts: How are these animals being helped?**

---

---

---

---

---

---

---

---

---

---

**Other Interesting Facts:**

---

---

---

---

---

---

---

---

Colour the area your species lives.
